

I am very concerned about the new rules that would allow fewer companies to own and control more media outlets. I oppose deregulation of the media and do not approve of these new rules. I also think there should be a delay well beyond June 2nd so that our federal representatives can consider this in more detail.

I also would like to point out that it was VERY difficult to get through to the FCC to make these public comments as servers and voice-mail boxes have been overloaded-- another reason why this should be delayed. Please listen to the public who wants a diverse media and local control rather than a few major conglomerates owning and controlling everything.
